PROFILE

Full Stack Engineer with 3+ years of experience specializing in scalable web architectures using React, Node.js, and TypeScript. Proven track record at Valtech building microservices and high-performance e-commerce solutions. Passionate about backend logic, API optimization, and agile environments.

WORK EXPERIENCE

- Valtech
Developer

2022 - PRESENT

- **E-commerce Frontend Development:** Developed high-performance Frontends using Next.js and Vtex IO, achieving a 85+ Lighthouse score for SEO and Accessibility, directly impacting user retention.
- **Microservices (Backend):** Architected and maintained critical Node.js microservices, handling communication between Vtex APIs and inventory systems, resulting in a 15% reduction in data fetch latency.
- **Continuous Improvement (Quality):** Active participation in the software development lifecycle, conducting code reviews and applying TDD (Test-Driven Development) practices to reduce the production error

- Henry

2021 - 2022

Full stack developer

- I designed and developed RESTful APIs with Node.js/Express to manage users and product data, resulting in a scalable backend.
- I implemented the Frontend of various project with React and Redux, improving the user experience with responsive design (Flex Layout and CSS3).
- Modeled and optimized relational (PostgreSQL/MySQL) and non-relational (MongoDB) database schemas to ensure query integrity and speed.
