PROFILE

Full Stack Developer with experience in building RESTful APIs and scalable frontend solutions using **React, Node.js, and TypeScript**. Strong analytical skills for code optimization and troubleshooting. My unconventional career path has equipped me with **solid leadership, communication, and problem-solving skills for working in agile environments**.

WORK EXPERIENCE

Valtech

2022 - PRESENT

Developer

- **E-commerce Frontend Development:** Implemented high-performance user interfaces using Vtex IO / React and Next.js, adhering to accessibility and SEO guidelines to improve search ranking and user experience.
- **Microservices (Backend):** Designed and maintained critical microservices in Node.js with Express, focusing on interaction with the Vtex API and external inventory management systems.
- Continuous Improvement (Quality): Active participation in the software development lifecycle, conducting code reviews and applying TDD (Test-Driven Development) practices to reduce the production error

Henry

2021 - 2022

Full stack developer

- I designed and developed RESTful APIs with Node.js/Express to manage users and product data, resulting in a scalable backend.
- I implemented the Frontend of various project with React and Redux, improving the user experience with responsive design (Flex Layout and CSS3).
- Modeled and optimized relational (PostgreSQL/MySQL) and non-relational (MongoDB) database schemas to ensure query integrity and speed.
